

Kathy Blair's Quantum Upgrade CD Rom September 2006 update

I am pleased to send you this Quantum Upgrade update on CD Rom. I continue to refine the many items in the matrix and will send future updates, as they are available. Visit the Quantum Upgrade website for information about updates. Visit the website to learn about the special I am running for those who purchase the Quantum Upgrade during this year.

<http://www.quantumupgrade.com>

If you plan to upgrade your Clasp32 software to a newer version--upgrading from an older to a newer version of Clasp32, Do That First, prior to installing Kathy Blair's Quantum Upgrade update! Follow the instructions provided on the Clasp32 software to accomplish this upgrade.

Instructions for installing Kathy Blair's Quantum Upgrade CD Rom update onto the computer where your Clasp32 software is installed.

Your computer should be on. No programs can be running.

Open the CD Rom drive.

Remove the Quantum Upgrade update CD Rom from its protective paper sleeve.

With the label side UP, put the Quantum Upgrade update CD Rom into the CD Rom drive.

Close the CD Rom drive

Wait until you hear that your computer has detected/recognized the CD Rom drive (the whirring sound will quit when this step is done)

IF YOUR COMPUTER AUTO-DETECTS THE CD IN THE CD ROM DRIVE

A window should open showing you what is on the CD Rom.

One file icon will be shown labeled "install". Double click this icon.

The install file will install the Quantum Upgrade update to your computer. This step takes less than ten seconds—do not blink otherwise you will miss your install!

IF YOUR COMPUTER DOES NOT AUTO-DETECT THE CD IN THE CD ROM DRIVE

If the window does not open, when you insert the CD into the CD Rom drive, open "My Computer" on your desktop.

Double click the CD Rom drive

One file icon will be shown labeled "install". Double click this icon.

The install file will install the Quantum Upgrade update to your computer. This step takes less than ten seconds—do not blink otherwise you will miss your install!

Then your Quantum Upgrade update will be complete!!

Open the CD Rom drive and remove the Quantum Upgrade update CD ROM disk from the drive.

Replace the CD Rom into its protective paper sleeve, and keep it in a safe place in case you need to update from it again.

Run a "test" to ensure that the Quantum Upgrade update software loaded correctly.

Open Clasp32 (the way you normally would) and work your way to the Main Test Matrix.

At the Main Test Matrix, type 9285 in the "GoToNo" window, located to the left of the "GoToNo" button. Click the "GoToNo" button.

If this line ends with "[lcv # \$]" then you know that your Quantum Upgrade update was successful.

Feel free to contact me by e-mail (blairlives@msn.com) if you need assistance in troubleshooting any issues, and to offer comments, suggestions, kudos.

Thanks for your continuing support of this massive Quantum Upgrade project!!

I know that you will enjoy using the new Quantum Upgrade update

Kathy Blair
